

## 4 in 1 Remineraliser Filter

1716010010

pH mineral

Ceramic far infrared balls

Maifanite stones

Designed for use on reverse osmosis systems or drinking water systems.

Contains 4 medias to add vital minerals to the water.

Makes the water more alkaline

Raises the pH of the water

*Maifanite stone*: adds vital minerals like Calcium to build bones, magnesium a key factor in the immune system, potassium to regulate electrolytes.

*Infrared Ceramic balls* : Based on the semi precious mineral tourmaline. Adds more vital minerals and increases the alkaline nature of the water.

*pH* : Increases the pH of the water bringing the added benefits of a neutral to alkaline pH

10" In-line filter cartridge normally with 1/4" push fit or threaded connections.

Mainly used to remineralise water after a reverse osmosis system has removed water contaminants

Typical life time : 1 year

Only to be used on cold water systems  
Not to be used on water that is not bacterially safe  
Contaminants are not removed with these filters
